## The Disc of the Signs

**We are excited to launch a new extraordinary .**

All the discs used in Esogetic Medicine have but one goal: they are using the reflex zones of the hologram on the surface of the skin to reach into an individual's implicit layers and trigger positive reactions.

The idea of utilizing symbols, patterns and holographic structures is based on the marvellous works of the Viennese physicist Erich Körbler and Prof. Calligaris, who have both explored geometrical figures on the skin.

in his professional pursuits Peter Mandel has also been quite fascinated by the human skin, which holds a key position between the implicit and the explicit, the inner and the outer layers of the human being.

In his creation of the Disc of the Signs Peter Mandel has used the signs of the zodiac in a modified version.

**The special feature of this disc is the individualized relationship to every single human being, through the selection of the sign.**

Applied in case of a disease or some persistent complaints the Disc of Signs contacts the inner blockages, and the treated individual often perceives an immediate reaction. That helps us to notice and understand the underlying background of a disease much faster.

During days of health the disc supports our well-being and assists us in completing the daily tasks.

We are overjoyed to be able to produce the Disc of Signs in a limited edition and to deliver it around December 2023.

Each Disc is a unique product with its own number, a personally signed certificate by Peter Mandel and an extensive user's manual for application.

**Orders placed and paid in advance until Nov. 15, 2023 receive a discounted price of 178 € instead of 198 €.**
